

DIMENSION PROGRAMMER

Software update of the Focal Dimension soundbar Firmware

Technical description

Program (Firmware)

- Version: V1.2
- File size: 312 KB

Software update

- Operating system compatibility: Windows 8, Windows 7
 - Date of release: 20 March 2015
 - Installation file size: 61 Mo
-

Update description

- Fix the touch screen instability issues (increase of the volume, source/input change) due to some TV models which have important electromagnetic emissions (mainly plasma screens).
 - Fix the freeze issue when stopping « Stand By » mode which can appear with DIGITAL or TV inputs.
-

Installation manual

- Download the firmware version you want to install from the Focal website:
http://www.focal.com/focal_dimension_programmer/
- Unzip « dimension_programmer_1.2.zip » file
- Open « dimension_programmer_1.2 » directory
- Double-click « setup.exe » file then attempt the program installation.
- Once the « Dimension Programmer » installation is over, close all open windows.
- Launch « Dimension Programmer » program located in the Windows programs menu.
- Follow the installation instructions of the firmware indicated in « Dimension Programmer » (it will explain when to connect USB cord <-> mini USB)
- Once the installation is done, you can unplug the USB <-> mini USB cord from the soundbar

IMPORTANT

To update Dimension firmware,
you need a USB cord <-> Mini USB

Information and contact

If you have any questions or issues with the installation, do not hesitate to contact your dealer or distributor.

To be informed of any available updates, you can register your Dimension soundbar (<http://www.focal.com/warranty>) or read the "Update" section (http://www.focal.com/focal_dimension_programmer/)
