Installation manual

- Download the firmware version you want to install from the Focal website:
http://www.focal.com/focal_dimension_programmer/
- Unzip « dimension_programmer_2.2.zip » file
- Open « dimension_programmer_2.2 » directory

IMPORTANT

To update Dimension firmware,
you need a USB cord <-> Mini USB

-
- Double-click « setup.exe » file then attempt the program installation.
 - Once the « Dimension Programmer » installation is over, close all open windows.
 - Launch « Dimension Programmer » program located in the Windows programs menu.
 - Follow the installation instructions of the firmware indicated in « Dimension Programmer » (it will explain when to connect USB cord <-> mini USB)
 - Once the installation is done, you can unplug the USB <-> mini USB cord from the soundbar

Information and contact

If you have any questions or issues with the installation, do not hesitate to contact your dealer or distributor.

To be informed of any available updates, you can register your Dimension soundbar (<http://www.focal.com/warranty>) or read the "Update" section (http://www.focal.com/focal_dimension_programmer/)
